PROFESSIONAL SUMMARY

Full Stack Developer and systems-aware builder with 4 years of experience scaling production web applications on the MERN stack with TypeScript. Specializes in end-to-end backend architecture, including REST/GraphQL APIs, microservices, Redis caching, and Amazon SQS message queuing. Proven expertise in designing complex authorization models (RBAC/UBAC) and managing monorepo environments. Adept at leveraging Agentic AI workflows, LLMs (Claude, ChatGPT), and deploying robust digital products, consistently delivering high-performance, resilient solutions for high-traffic government and enterprise platforms. AWS Certified Solutions Architect - Associate.

PROFESSIONAL EXPERIENCE

Full Stack Developer - Gov Event Portals (BRICS & IAFS 2026)

Feb 2026 – Present

Appinventiv - Client: National e-Governance Division (NEGD), MeitY

- Architecting and delivering the **India-Africa Forum Summit (IAFS 2026 - iafs2026.in)** and **BRICS** Event Management Portals, coordinating international summit-scale events across multiple stakeholder bodies using a monorepo architecture.
- Built the Exhibition module end-to-end using Node.js/Express REST APIs and React interfaces covering exhibitor onboarding, listings, and schedule management for international delegations.
- Participated in the NEGD Hackathon, engineering a suite of reusable common React components—specifically Quiz, Pledge, and Survey modules—standardizing UI/UX and accelerating cross-platform development.
- Designed and implemented the platform's Role-Based Access Control (RBAC) and User-Based Access Control (UBAC) layers, integrating persona dashboards and enforcing granular, permission-scoped access in line with strict government audit requirements.
- Managed strategic branch deployments and orchestrated automated CI/CD pipelines, including executing high-stakes emergency code hotfixes directly to development environments to ensure continuous project delivery.

Freelance Full Stack Developer

Mar 2024 – Nov 2025

Independent Contractor - Remote

- Architected and shipped 10+ production web applications end-to-end on the MERN stack, deploying frontend interfaces via Vercel and backend APIs via Render.
- Refactored database schemas and application logic for a 20% gain in application speed, and automated recurring client workflows to remove roughly 5 hours of manual processing per week.

Full Stack Developer

Jan 2024 – Apr 2024

Alphaloop IT Pvt. Ltd.

- Engineered end-to-end product features across MongoDB, Express, React, and Node.js in a fast-moving Agile team.
- Built modular, reusable React components plus secure backend endpoints with authentication and input validation.

Node.js Developer

Jun 2022 – Aug 2023

Arcgate Technologies LLP

- Designed and delivered 25+ RESTful APIs powering communication between core services.
- Reduced average API response time by 30% through query optimization and server-side logic refinement.
- Introduced Redis-based caching so core modules absorbed high-traffic load without degradation; built structured logging and error-monitoring pipelines supporting 99.9% system uptime.

KEY PROJECTS

Scalable E-commerce Microservices Platform

Tech stack: React, Node.js, MongoDB, Redis, WebSockets, Amazon SQS

- Multi-tenant microservices architecture for high-concurrency traffic; Redis caching cut database read load by 60%, and WebSockets powered real-time inventory and order tracking.

Enterprise ERP & RBAC System

Tech stack: Node.js, MongoDB, Express, JWT, UBAC

- Granular RBAC/UBAC across 50+ secured API endpoints; custom request-validation middleware cut system crashes by 15%.

TECHNICAL SKILLS

Backend	Node.js, TypeScript, Express.js, REST & GraphQL APIs, Microservices, WebSockets, Amazon SQS
Frontend	React.js, Next.js, TypeScript, Redux Toolkit, Material-UI, PWA
AI & Agentic Workflows	Agentic AI integration, LLMs (Claude, ChatGPT, Google AI Pro), Prompt Engineering, automated media generation workflows
Databases	MongoDB, PostgreSQL, MySQL, Redis, Supabase
DevOps & CI/CD	Docker, Kubernetes, AWS (S3), GitHub Actions, Jenkins, Git, Vercel, Render, Monorepo Management
Testing & Security	Jest, Mocha, JWT, RBAC / UBAC, secure API design

EDUCATION & CERTIFICATIONS

- B.Tech, Computer Science & Engineering - Rajasthan Technical University, Jaipur
- AWS Certified Solutions Architect - Associate (SAA-C03)
